# **Material Safety Data Sheet**

Issuing Date 04-Jun-2009 Revision Date Revision Number 0

### 1. PRODUCT AND COMPANY IDENTIFICATION

Product Name Duro Patch 115

Recommended Use Blacktop Patch.

Supplier Address
Mohawk Asphalt Emulsions
6 Freemans Bridge Road
Scotia, NY 12302

TEL: 518-372-7788

Company Emergency Phone Number 1-800-328-2482

### 2. HAZARDS IDENTIFICATION

# WARNING!

# **Emergency Overview**

Vapors may be irritating to eyes, nose, throat, and lungs May cause central nervous system depression

May contain and release hydrogen sulfide which is a highly toxic and flammable gas Flammable vapors can accumulate during long term heated storage of this material

Hydrogen Sulfide (H2S) has a rotten egg "sulfurous" odor. This odor should not be used as a warning property of toxic levels because H2S can overwhelm and deaden the sense of smell. H2S meter or colorimetric indicating tubes are typically used to determine the concentration of H2S

Appearance Black, Viscous

Physical State Solid, Aggregate coated by
Godor Petroleum like liquid.

OSHA Regulatory Status This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR

1910.1200).

Potential Health Effects

Principle Routes of Exposure Inhalation, Skin contact, Eye contact.

**Acute Toxicity** 

**Eyes** May cause irritation.

Skin Irritating to skin. Repeated exposure may cause skin dryness or cracking. Repeated or

prolonged skin contact may cause allergic reactions with susceptible persons.

#### Inhalation

May be harmful if inhaled. May cause central nervous system effects such as headache, dizziness, loss of balance and coordination, unconsciousness, coma, respiratory failure and death. Hydrogen Sulfide gas between 15 and 500 ppm can cause headache, nausea and dizziness. Continued exposure at these levels can lead to loss of reasoning and balance, difficulty in breathing, fluid in the lungs, and prossible loss of consiousness. Greater then 500 ppm can cause rapid unconsciousness due to respiratory paralysis and death by suffocation. Greater then 1000 ppm can cause immediate unconsciousness and death if not prompty revived. Contains low levels of Hydrogen sulfide which may be released and can be fatal if inhaled at certain concentrations.

Ingestion

May be harmful if swallowed. Ingestion may cause gastrointestinal irritation, nausea, vomiting and diarrhea. May cause additional affects as listed under "Inhalation".

#### **Chronic Effects**

Prolonged exposure may cause chronic effects. Prolonged or repeated contact may dry skin and cause irritation. Repeated contact may cause allergic reactions in very susceptible persons. The International Agency for Research on Cancer (IARC) has determined that there is inadequate evidence that undiluted, air-refined asphalt is carcingoenic to experimental animals. Limited evidence exists that undiluted steam-refined and cracking residue asphalts is carcinogenic to animals. Additionally, IARC has concluded that there is inadequate evidence that asphalts alone are carcingoenic to humans. Repeated long term skin application of similar petroleum crudes have been shown to cause skin cancer in laboratory animals. Intentional misuse by deliberately concentrating and inhaling contents may be harmful or fatal. Chronic hydrocarbon abuse has been associated with irregular heart rhythms and potential cardiac arrest.

Hydrogen sulfide (H2S), a colorless, rotten-egg smelling, minor component of this product, can affect the body if it is inhaled or if it comes in contact with the eyes, skin, nose or throat. Odor cannot be used as an indication of its presence since exposure to H2S causes loss of the sense of smell. Inhalation of high concentrations of hydrogen sulfide (>1000 ppm) may cause coma , convulsions, and death after a single overexposure due to it's ability to be a rapidly acting systemic poison that causes respiratory paralysis. Lower and prolonged doses can cause severe respiratory tract irritation and inflammation including eye irritation and damage and central nervous system effects such as headache, fatigue, irritability, insomnia, and stomach upset. Pneumonitis (chemically induced pneumonia) can also occur .

### **Aggravated Medical Conditions**

Respiratory disorders, Skin disorders.

#### **Environmental Hazard**

Harmful to aquatic organisms, may cause long-term adverse effects in the aquatic environment. See Section 12 for additional Ecological Information.

#### 3. COMPOSITION/INFORMATION ON INGREDIENTS

Chemical Name	CAS-No	Weight %
Limestone	1317-65-3	91-95
Asphalt	8052-42-4	4-6
Fuels, diesel, no. 2	68476-34-6	1.5

Asphalt can contain hydrogen sulfide (CAS # 7783-06-4), a naturally occurring substance found in crude oil, a material from which asphalt is derived. Amounts contained in this product are considered residual, but can be released upon heating.

4. FIRST AID MEASURES

**General Advice** Show this safety data sheet to the doctor in attendance.

**Eye Contact** Rinse immediately with plenty of water, also under the eyelids, for at least 15 minutes. If

symptoms persist, call a physician.

**Skin Contact** Wash off with warm water and soap. Do not remove with solvent. Use waterless hand cleaner

followed by soap and water. Remove and clean contaminated clothing.

Inhalation Move victim to fresh air. Administer oxygen if breathing is difficult and you are trained. If

breathing has stopped, contact emergency medical services immediately.

Rinse mouth. Drink plenty of water. Do NOT induce vomiting. Never give anything by mouth to Ingestion

an unconscious person. Consult a physician.

Keep victim warm and quiet. Notes to Physician

**Protection of First-aiders** Ensure that medical personnel are aware of the material(s) involved, and take precautions to

protect themselves.

5. FIRE-FIGHTING MEASURES

Flammable Properties Not flammable. Combustible material: may burn but does not ignite readily. Vapors are

flammable.

**Flash Point** Not determined.

Suitable Extinguishing Media Dry chemical, CO<sub>2</sub>, water spray or regular foam. Use water spray or fog; do not use straight

streams. Move containers from fire area if you can do it without risk.

**Hazardous Combustion Products** Hydrogen sulfide, Oxides of sulfur, Nitrogen oxides (NOx), Carbon oxides.

**Explosion Data** 

Sensitivity to Mechanical Impact Sensitivity to Static Discharge

None

Specific Hazards Arising from the

Chemical

May be ignited by heat, sparks or flames.

Vapors may form explosive mixtures with air. Vapors may travel to source of ignition and flash back. Most vapors are heavier than air. They will spread along ground and collect in low or

confined areas (sewers, basements, tanks).

**Protective Equipment and Precautions for Firefighters**  As in any fire, wear self-contained breathing apparatus pressure-demand, MSHA/NIOSH

(approved or equivalent) and full protective gear

Health Hazard 2 **NFPA** Flammability 1 Stability 0 **Physical and Chemical** 

Hazards '

**HMIS** Health Hazard 2\* Flammability 1 **Physical Hazard** 0 Personal Protection -

# 6. ACCIDENTAL RELEASE MEASURES

Personal Precautions ELIMINATE all ignition sources (no smoking, flares, sparks or flames in immediate area). All

equipment used when handling the product must be grounded. Do not touch or walk through

spilled material. Stop leak if you can do it without risk.

**Environmental Precautions** Prevent entry into waterways, sewers, basements or confined areas.

Methods for Containment A vapor suppressing foam may be used to reduce vapors. Absorb or cover with dry earth, sand

or other non-combustible material and transfer to containers.

Methods for Cleaning Up

Use clean non-sparking tools to collect absorbed material.

Other Information Water spray may reduce vapor; but may not prevent ignition in closed spaces.

#### 7. HANDLING AND STORAGE

Handling Ensure adequate ventilation. Take precautionary measures against static discharges. Keep

away from heat, sparks and open flame. No smoking.

**Storage** Keep in properly labeled containers. Keep away from heat and sources of ignition.

#### 8. EXPOSURE CONTROLS / PERSONAL PROTECTION

**Personal Protective Equipment** 

**Eye/Face Protection Skin and Body Protection**Tightly fitting safety goggles.
Wear protective gloves/clothing.

Respiratory Protection None required under normal usage. If exposure limits are exceeded or irritation is experienced,

NIOSH/MSHA approved respiratory protection should be worn.

Hygiene Measures When using, do not eat, drink or smoke. Provide regular cleaning of equipment, work area and

clothing.

9. PHYSICAL AND CHEMICAL PROPERTIES

Appearance Black, Viscous. Odor Petroleum like.

Odor Threshold No information available Physical State Solid, Aggregate coated by liquid

**pH** No information available

Flash Point No information available Autoignition Temperature No information available

**Decomposition Temperature** No information available **Boiling Point/Range** 132°C

Melting Point/Range 50°C

Flammability Limits in Air No information available Explosion Limits No information available

Specific Gravity 2.2-2.4 (Approximately) Water Solubility Negligible

Solubility No information available Evaporation Rate No information available

Vapor PressureNo data availableVapor DensityNo data available

VOC Content Not applicable

# 10. STABILITY AND REACTIVITY

**Stability** Stable under recommended storage conditions.

Incompatible Products Strong oxidizing agents.

Conditions to Avoid Heat, flames and sparks. Heating can release hazardous gases.

Hazardous Decomposition Products Hydrogen sulfide.

**Hazardous Polymerization** Hazardous polymerization does not occur.

# 11. TOXICOLOGICAL INFORMATION

### **Acute Toxicity**

**Product Information** No acute toxicity information is available for this product.

**Inhalation** There is no data available for this product. Avoid breathing vapors or mists. May cause central

nervous system depression.

**Eye Contact** There is no data available for this product. May cause irritation.

**Skin Contact**There is no data available for this product. Irritating to skin. Repeated exposure may cause

skin dryness or cracking. May cause sensitization of susceptible persons.

Ingestion Low order of toxicity based on components. May be harmful if swallowed. Ingestion may cause

gastrointestinal irritation, nausea, vomiting and diarrhea.

#### **Component Information**

Chemical Name	LD50 Oral	LD50 Dermal	LC50 Inhalation
Asphalt	5000 mg/kg (Rat)	2000 mg/kg (Rabbit)	

Chemical Name	LD50 Oral	LD50 Dermal	LC50 Inhalation
Hydrogen sulfide			0.701 mg/L (Rat)4 h
			0.99 mg/L (Rat) 1 h

#### **Chronic Toxicity**

#### **Chronic Toxicity**

Prolonged exposure may cause chronic effects. Prolonged or repeated contact may dry skin and cause irritation. Repeated contact may cause allergic reactions in very susceptible persons. The International Agency for Research on Cancer (IARC) has determined that there is inadequate evidence that undiluted, air-refined asphalt is carcingoenic to experimental animals. Limited evidence exists that undiluted steam-refined and cracking residue asphalts is carcinogenic to animals. Additionally, IARC has concluded that there is inadequate evidence that asphalts alone are carcingoenic to humans. Repeated long term skin application of similar petroleum crudes have been shown to cause skin cancer in laboratory animals. Intentional misuse by deliberately concentrating and inhaling contents may be harmful or fatal. Chronic hydrocarbon abuse has been associated with irregular heart rhythms and potential cardiac arrest.

Hydrogen sulfide (H2S), a colorless, rotten-egg smelling, minor component of this product, can affect the body if it is inhaled or if it comes in contact with the eyes, skin, nose or throat. Odor cannot be used as an indication of its presence since exposure to H2S causes loss of the sense of smell. Inhalation of high concentrations of hydrogen sulfide (>1000 ppm) may cause coma, convulsions, and death after a single overexposure due to it's ability to be a rapidly acting systemic poison that causes respiratory paralysis. Lower and prolonged doses can cause severe respiratory tract irritation and inflammation including eye irritation and damage and central nervous system effects such as headache, fatigue, irritability, insomnia, and stomach upset. Pneumonitis (chemically induced pneumonia) can also occur.

### Carcinogenicity

The table below indicates whether each agency has listed any ingredient as a carcinogen.

Chemical Name	ACGIH	IARC	NTP	OSHA
Asphalt			Known	
Fuels, diesel, no. 2	A3			

ACGIH: (American Conference of Governmental Industrial Hygienists)

A3 - Animal Carcinogen

NTP: (National Toxicity Program) Known - Known Carcinogen

**Target Organ Effects** 

Respiratory system, Skin, Central nervous system (CNS).

### 12. ECOLOGICAL INFORMATION

#### **Ecotoxicity**

Harmful to aquatic organisms, may cause long-term adverse effects in the aquatic environment.

Chemical Name	Toxicity to Algae	Toxicity to Fish	Toxicity to Microorganisms	Daphnia Magna (Water Flea)
Hydrogen sulfide		LC50= 0.016 mg/L		EC50 = 0.022 mg/L 96 h
		Pimephales promelas 96 h		_
